

PINULTIMATE®

QUICK-RELEASE HITCH PIN

Put a little giddyup in your hitch!

If you tow a trailer, you've dealt with hitch pins. These ordinary, utilitarian steel rods are prone to rusting and typically secured by clumsy R-clips that invariably result in a knuckle-scraping experience.

The quick-release hitch pin

PinUltimate is different! It's a quick-release hitch pin. It makes securing your hitch a breeze.

Made of Titanium and coated with Cerakote®, PinUltimate will never rust and will always operate smoothly.

Unique bi-directional key for easy locking

And, PinUltimate has a premium lock that features a bi-directional key which makes locking/unlocking easy.

Put a little giddyup in your hitch with PinUltimate!

HOW IT WORKS

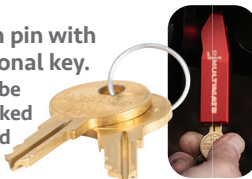

1. Press the quick-release button to release the cap.

2. Remove cap, slide PinUltimate through receiver/hitch, replace cap and release thumb button.

3. Lock hitch pin with bi-directional key.

Note: Can be used in locked or unlocked position

"The PinUltimate Hitch Pin is one impressive, precision piece of equipment! Once you use it you'll never go back."

100% designed, machined and assembled in Montana!

Backed by our LIFETIME WARRANTY

PINULTIMATE®
QUICK-RELEASE HITCH PIN

A product of Big Sky Precision, Inc.

"Wow! What a difference! Blows away my old school hitch pin!"

PinUltimate® is loaded with performance features!

Exclusive ConnecTrick™ Quick-Release System

The key to the PinUltimate Hitch Pin is the clever ConnecTrick™ Quick Release System. With this unique design, depressing the thumb button on the hitch pin handle releases the positive-locking balls which protrude from the shaft to hold the end cap in place. With the thumb button depressed, the pin is free to slide. Releasing the thumb button locks the cap in place.

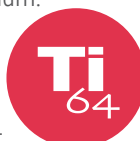

"Snap-To-It" Clipless Connector Cap

One must secure an ordinary hitch pin with a simplistic "R" clip that slides into a groove perpendicular to the pin shaft. This almost always occurs in tight quarters which commonly results in scraped knuckles. PinUltimate is different. You push the pin through the hole in the receiver (with one hand) where it conveniently slides into the Snap-To-It Connector Cap (held in position by your other hand) on the opposite side. No clips. No cross stream maneuvers. No scraped knuckles. It's so easy you can do it in the dark!

"Never Rust" Titanium Construction

All exposed parts on a PinUltimate Hitch Pin (Titanium model) are made of premium, heat-treated 6AL4V (Ti-64) titanium. This means you can be confident that your PinUltimate Hitch Pin will work flawlessly even if exposed to saltwater or road salt.

"Be Nimble" Cylinder Lock With Bidirectional Key

Every PinUltimate Hitch Pin is fitted with a premium Be Nimble Cylinder Lock that features a bi-directional key that works no matter which way you insert it. This makes locking and unlocking the hitch pin extra easy in tight quarters or low light conditions.

Fully-Machined, Ergonomic "Power Red" Handle

The handle on a PinUltimate Hitch Pin is ergonomically designed and fully CNC-machined from aircraft grade billet aluminum and then treated with a "power red" Cerakote® finish to protect it from the elements.

Treated With Cerakote®

Every PinUltimate Hitch Pin is first anodized and then treated with Cerakote®, the proven ceramic coating that offers superior corrosion protection.

100% Made in the USA!

Every PinUltimate Quick Release Hitch Pin is 100% made in the USA using components that are 100% made in the USA.

The PINULTIMATE "Knuckle Saver" 90-Day Satisfaction Guarantee

We are so confident that you will love your new PinUltimate Quick-Release Hitch Pin that we will guarantee your satisfaction. If PinUltimate isn't the fastest and easiest hitch pin you've ever used, return it for a full refund. See website for details.
